Compass Learning® Product Portfolio

Compass Learning is a premier provider of K–12 personalized learning, differentiated instruction, intervention, and credit recovery solutions. A new product suite of learning acceleration software™ now includes:

**Pathblazer™** — reading and math intervention for elementary and middle school students. Pathblazer addresses critical thinking and 21st century skills with fun and rigorous standards-aligned content, enabling effective math and reading intervention easier. The program pinpoints specific areas of student need and then prescribes a highly-specific learning path and individualized learning acceleration plan™ to bring struggling students back up to grade level proficiency.
- Expected to be available at the start of the 2014–2015 school year

**Hybridge™** — blended learning for elementary and middle school.
Hybridge is aligned to leading basal textbooks to help teachers ease into a blended learning environment and comfortably transition to a balance of digital and face-to-face instruction. The fun, rigorous content and differentiated instruction engages students and empowers educators with real-time progress monitoring and robust reporting.
- Expected to be available at the start of the 2014–2015 school year
- Expected to be released spring 2015

**Gradbound™** — credit recovery for high school. Gradbound increases graduation rates by enabling students to recover the credits they need to graduate. Whether recovering an entire course or part of a course, students can access the necessary tools and resources to fulfill course requirements at their own pace, anytime, anywhere.
- Expected to be released spring 2015

**CompassLearning Odyssey®** assesses a student’s strengths and needs, then prescribes a personalized learning path complete with rigorous and engaging curriculum. Odyssey also offers educators customized reports to track and measure student, school, and district progress, as well as inform instructional decisions.
- Ready for district implementation now

**Compass Learning® High School — blended learning and credit recovery for high school.** Compass Learning High School gives students custom-built learning support, no matter if they’re working to recover credits, preparing for college, or building the skillset they need to get a good job. With anytime, anywhere online access to rigorous, standards-aligned content, Compass Learning® High School allows students to work around their busy schedules.
- Expected to be available at the start of the 2014–2015 school year

**Renzulli Learning®** — project-based learning and enrichment. Renzulli Learning® project-based learning is grounded in the recognition that students often learn best when they tackle real-world problems and own the challenges required to solve them. Renzulli Learning® helps teachers differentiate instruction and empower students by identifying individual student interests and then recommending appropriately matched standards-aligned projects and activities.
- Ready for district implementation now
The Compass Learning® mission:
To partner with educators to ensure that students achieve record academic results, one learner at a time

Based in Austin, Texas, one of the world’s most connected cities, Compass Learning® brings together educational thought leaders, content experts, software engineers, designers, animators, and scriptwriters and challenges them to provide educators with the tools and resources needed to ensure student success and make the most of educators’ precious time and energy. The result? A full suite of software and service solutions precision-built to help educators efficiently address each student’s educational challenges.

Producing greater student progress faster.
More than 2,000,000 students and 70,000 teachers in 10,000 schools rely on Compass Learning for personalized learning solutions. Accessible 24/7 via desktop, laptop, or mobile device, our learning acceleration softwareTM motivates students and re-energizes the learning experience.
“[With Compass Learning,] our students are happier, more successful, and are engaged learners. That says it all.”

Dr. Toni Jones
Chief Academic Officer, OK
As an educator, you know that literacy and math skills are the root of academic success. Students who struggle miss out on the fun of learning—the joy that comes from understanding, connecting the dots, and skillfully steering their own education.

Help students take a big leap forward
Intervention works best when lessons are tailored to students’ individual needs. But how do you know exactly where to begin and how to address their gaps? No two students are alike, and no two struggling learners have exactly the same needs.

Instruction as unique as they are
Compass Learning® makes it easier for you to identify proficiency level, pinpoint skill and concept gaps, and employ individualized intervention strategies to help struggling students. We use data to deliver personalized instruction that reinforces knowledge and skills as students spiral upward through the program.
READING AND MATH INTERVENTION FOR ELEMENTARY AND MIDDLE GRADES

The right content for the right student at the right time

Solid literacy skills and core math concepts are the first steps on the way to academic success. Pathblazer™ learning acceleration software™ gives teachers the tools they need to speed struggling elementary and middle school learners up to grade-level proficiency in math or reading.

Show them the way forward

The Pathblazer program builds confidence by starting students at their highest proficiency level and guiding their acceleration forward. The software prescribes an individualized acceleration plan™ filled with fun, motivating content while filling in the gaps. Plus our curriculum is Common Core and state standards-aligned, so you’ll know that your students aren’t just catching up—they’re meeting the mark.

Pathblazer™—a whole new light on the subject

Pathblazer addresses critical thinking and 21st century skills with fun and rigorous standards-aligned content, making effective reading and math intervention easier. Pathblazer learning acceleration software includes:

- Adaptive screeners that determine a student’s highest functional performance level
- Diagnostic assessments to pinpoint skill and concept gaps
- Automatically generated individualized acceleration plans
- Highly engaging video, animation, audio, graphics, and tools
- Non-repetitive reteach
- Reporting functions that generate actionable data, freeing teachers to help students
- Anytime, anyplace web access via desktop, laptop, or mobile device
- Full integration with NWEA™ MAP®, Scantron Performance Series®, and Renaissance® STAR

Federal funding eligibility: T1A, SIG, ITQ, MSPP, CEIS, RSF, CCLC (See page 22)
Without a doubt, implementing blended learning—whether rotational, flipped, or flex model—can be a challenge. The secret is finding that precise balance between face-to-face instruction and digital learning.

Place your students at the center of a powerful learning model

To make blended learning work, Compass Learning® provides student-centered solutions with:

- Fun and rigorous content for grades K–12
- Anytime, anywhere web access via desktop, laptop, or mobile device
- Individualized and small group assignments
- Resources and professional development to adopt blended learning models
- Real-time reporting for grouping, immediate feedback, and data-driven instructional decision making
Compass Learning® includes implementation training as part of your Hybridge™ purchase. Our Learning Services team offers additional professional development packages to empower teachers and increase educator effectiveness. Call us today: 866-586-7387.

www.compasslearning.com
Personalizing paths to essential graduation credits

For most students, the end of high school is an exciting time—they can see the finish line approaching. Graduation is a rite of passage leading to a future full of possibilities.

But what about struggling learners, or students with life challenges who feel as if they’re falling farther and farther behind? For them, the fun, excitement, and smiles are a long way off. And the joy of accomplishment? It’s not part of the equation.

A different approach . . .

Usually, missing credits and failed or incomplete classes don’t occur for no reason. For students with these challenges, something just isn’t working, so changing the way students approach schoolwork—shifting the paradigm—seems like a no-brainer. Digital learning has several advantages—it’s dynamic, tactile, and appeals to multiple senses. And with adaptive elements in a digital credit recovery program, learning gaps can be identified and brought into focus, allowing students to address those gaps and accelerate to the finish line.

. . . for improved results

At Compass Learning®, we take credit recovery, paradigm shifts, and second chances very seriously. That’s why our credit recovery solutions offer rigorous yet fun, dynamic digital content presented in a student-friendly and teacher-approved voice. The content is delivered in a system that identifies learning gaps, prescribes a personalized learning path to close those gaps, lets students estimate a pace that will help them finish on time, and ultimately provides students with a legitimate shot at earning credits and graduating with their peers. Don’t be surprised when students say, “Credit recovery is the best class ever!”
Staying the course

We know that educators work incredibly hard to ensure every student graduates on time. But finding ways to keep students on track is a huge challenge. You’re not alone, though—Compass Learning® is here to help.

Helping all students reach the finish line

Gradbound™ by Compass Learning can help you increase graduation rates by giving students an opportunity to recover the credits they lack. Our standards-aligned learning acceleration software™ lets students recover individual course credits in multiple subject areas simultaneously. Gradbound enables students to focus on mastering gap skills and concepts, set a pace to finish on time, and increase the chances of graduating with their peers.

Gradbound provides students and educators with:

- Diagnostics to target gap skills and concepts
- Pace-setting function to calculate likelihood of course completion
- Fun, engaging content
- Scaffolding and non-repetitive reteach
- Robust reporting tools to enable data-driven decisions
- 24/7 access including full mobile compatibility

Federal funding eligibility:
T1A, SIG, ITQ, MSPP, CEIS, RSF, CCLC (See page 22)

A new take on high school

For high school students, the old way of doing things just won’t cut it. Today’s students require targeted solutions to address specific needs, presented in a tone and format that speaks specifically to them.

What they need, the way they want it

The point of Compass Learning® High School learning acceleration software™ is to help teachers connect with today’s high schoolers. With anytime, anywhere access to rigorous, standards-aligned content, students can work around their busy schedules. Unlike other digital programs with flat, boring lessons, Compass Learning High School grabs student focus with fun interactive lessons and a teen-friendly voice that presents learning on their terms—literally.

Inspire and equip your students for graduation, college, and careers with:

- State and Common Core standards-aligned curriculum
- Diagnostic assessments for targeted, individualized instruction
- Credit recovery, credit attainment, and diploma equivalency prep
- Full integration with Scantron Performance Series® and Renaissance® STAR assessments
- Scaffolding and non-repetitive reteach
- Robust reporting tools that make data actionable and inform instructional decisions
- Interactive writing tools and virtual manipulatives

Federal funding eligibility:
T1A, SIG, ITQ, MSPP, CEIS, RSF, CCLC (See page 22)

www.compasslearning.com
It’s time for a fresh approach

Today’s students will be tomorrow’s leaders—will they be ready to address tomorrow’s challenges? We can’t possibly know what those challenges may be—nor train our students to meet them. But we can ensure they develop the skills to investigate and explore, to think critically and creatively, to communicate, collaborate, and design new solutions for tomorrow.

True project-based learning starts with the recognition that students learn better when they’re tackling real-world problems and, with a teacher’s help, taking ownership of the challenges involved in solving them. Compass Learning® digital learning projects drive critical thinking, communication, collaboration, and creativity to deepen and extend the learning experience of every child in the class.

Renzulli Profiler®
Research-based profiler identifies students’ interests and learning preferences to guide student inquiry and anchor challenges in student interests

Resource Database
Tens of thousands of vetted resources aligned to standards and student learning preferences

Project Library
Project, Unit, and Assignment libraries include hundreds of scaffolded challenges with aligned resources in a differentiated engine

www.compasslearning.com
Enriching instruction with project-based learning

Big problems. Big projects. Big thinking. Big doing.

Students develop real-world skills when they tackle real-world problems and, with a teacher’s help, take ownership in solving them. With Renzulli Learning®:

- Meaningful projects demand research, critical thinking, creativity, communication, and collaboration
- Profiler ensures assignments and potential deliverables align with student interests
- Want-to-know assignments develop standards-aligned knowledge and skills in context of project challenges
- Real-world deliverables (e.g., work plans, designs, presentations, reports) keep projects authentic and prepare students for college and career

Federal funding eligibility:
ITQ, MSPP, RSF, CCLC (See page 22)

Start them down the right road

Elementary educators both nurture students’ enthusiasm for learning and ensure that they continue to make real academic progress. Compass Learning® is as passionate about learning as you are. We want to be your partner to help students reach their goals and achieve success. Together, let’s create a personalized learning experience that capitalizes on students’ strengths, interests, and learning styles. We can combine your passion for high-quality instruction with our expertise in developing fun, rich, rigorous digital lessons, activities, projects, assessments, and learning tools. As a team, we can serve up enjoyable learning experiences that get young minds excited about learning—and keep them that way.
Elementary school solutions

Pathblazer™
by Compass Learning®

READING AND MATH INTERVENTION
For students falling behind in class, school can be a pretty frustrating place. The trick for teachers is figuring out how to support these struggling learners by helping them close the gaps, build confidence along the way, and build a strong foundation for future academic success. Pathblazer™ makes it easy.

Federal funding eligibility: T1A, SIG, ITQ, MSPP, CEIS, RSF, CCLC (See page 22)

Hybridge™
by Compass Learning®

BLENDED LEARNING
Quickly differentiated instruction and improved student engagement are just a couple of the reasons why Hybridge™ is the right solution for your district’s blended learning initiative. Blended learning doesn’t have to be difficult or time consuming. Let Hybridge™ help.

Federal funding eligibility: T1A, SIG, ITQ, MSPP, CEIS, RSF, CCLC (See page 22)

Renzulli Learning®
by Compass Learning®

Project-based learning lets students dig deeper and reach higher. Wouldn’t it be amazing if those projects also matched the interests and expression styles of each and every one of your students? Stop what-iffing and check out Renzulli Learning®.

Federal funding eligibility: ITQ, MSPP, RSF, CCLC (See page 22)

Compass Learning® elementary school solutions build a rock-solid foundation, help students accelerate and extend their learning, and provide extra support to those who need it. Our solutions align with state and Common Core standards and are based on the most proven learning research.

Let’s talk about how we can help you accelerate learning in your elementary school students! 866-586-7387

The missing pieces to your middle school puzzle

Middle school educators know that students display a staggering range of learning needs. Some students want to sit back and absorb while others are all about open-ended exploration. And don’t forget the student who regularly asks, “When am I ever going to use this?” Reaching them all individually can be a real challenge.

At Compass Learning®, we understand how hard it can be to inspire every student. That’s why our middle school products are designed to help teachers recognize student needs and interests and provide developmentally appropriate instruction and intervention that personalizes every student’s learning experience. Through fun, targeted digital lessons, activities, projects, and assessments, students can obtain the individualized instruction they need to learn, flourish, and lay a solid foundation for high school.
Middle school solutions

**Pathblazer™ by Compass Learning®**

**READING AND MATH INTERVENTION**
For students falling behind in class, school can be a pretty frustrating place. The trick for teachers is figuring out how to support these struggling learners by helping them close the gaps and build confidence along the way. Pathblazer™ makes it easy.

Build their confidence, ignite their ambition

Think about it. What if your high school students truly felt like they had a choice? What if they could approach these last years of school really believing they hold the key to their own success—that they have the power to choose their own paths toward graduation, college, and careers? Many have this confidence, but others rely on educators like you for help and encouragement. And we want to be right there with you.

Compass Learning® builds digital solutions that engage, enlighten, and reignite a students’ passion for learning. Let Compass Learning help you increase graduation rates, ready your students for college, develop the necessary skills for life after high school, and build the confidence they need to succeed no matter where they choose to go.
Gradsbound™ can help you increase graduation rates by giving students a real chance to make up ground and recover the credits they're missing. Gradsbound streamlines and accelerates the credit recovery experience by keeping and holding students' attention, allowing them to focus on the precise points where they're falling short, and letting them set their own pace for success. When credit recovery is the challenge, let Gradsbound™ be the solution.

**Federal funding eligibility:** T1A, SIG, ITQ, MSPP, CEIS, RSF, CCLC (See page 22)

Compass Learning® High School

In high school, students are constantly shifting gears to meet a variety of educational challenges. Whether they're working to regain credits for graduation, preparing for college, earning AP credits, or building a marketable skillset for the world of work, Compass Learning® High School gives students the learning support they're after in just the way they like.

**Federal funding eligibility:** T1A, SIG, ITQ, MSPP, CEIS, RSF, CCLC (See page 22)

Compass Learning® helps educators provide the personalized learning opportunities each student needs to succeed in high school and beyond. Our solutions are targeted to meet the specific academic needs of students on the brink of adulthood. Plus, our flexible, 24/7, mobile compatible delivery is tailor-made for teens’ busy lives and schedules.

Let us show you how we can help you drive real high school academic achievement.

Learning Services

Implementation Support: A fast start for fast results

Time is valuable. And in the world of K–12 education, time is in short supply. Students need a commitment to their individual learning needs now, and there’s no time to spare. At Compass Learning®, we developed our Fast Start program to move you from purchase to value in the virtual blink of an eye.

Fast Start includes implementation training as part of your solutions purchase.
Professional Development: Increasing educator effectiveness

We know that classroom success begins with empowering teachers. That’s the focus of our Learning Services team of professionals and all of our professional development.

Our Learning Services team offers engaging, relevant, timely, flexible programs delivered by veteran educators who combine extensive classroom experience with expert-level knowledge of instructional best practices. Our professional development comprises a blend of workshops, leadership planning, real-world instructional coaching, and technology offerings that has a measurable and sustainable impact on student achievement.

We believe in professional development that includes small chunks of learning over time via multiple delivery methods, supported by modeling, observation, coaching, and feedback. If you want to improve your practices systematically, you’ve come to the right place.

Our Learning Services team delivers professional development courses including:

- Using Data Effectively
- Classroom Modeling
- Differentiated Instruction
- Writing Tools for the Elementary Classroom
- Instructional Coaching—Observe, Model, and Give Feedback
- Meet Common Core Standards
- Extend Learning for Common Core
- Writing for Common Core

. . . and more. For further information call 866-586-7387.
Partnerships

To offer the best educational solutions to our clients, Compass Learning® has joined with a select number of major education players. These partnerships have been carefully chosen to provide best-in-class solutions to enhance student achievement and educator effectiveness.

Assessment Partners

Quality assessment is the foundation for personalizing instruction to meet each student's needs. So we partner with the best assessment providers to give you options and make assessment data immediately actionable for each and every student. Our assessment partners quickly pinpoint each student’s proficiency level. Then, Compass Learning® automatically provides the “now what?” solution that translates data into individualized learning paths for each student. Our assessment partnerships offer you the flexibility to plug into virtually any assessment platform you choose, including our own rigorous formative and summative suite.

Northwest Evaluation Association™ (NWEA™) provides a computer-adaptive assessment suite that quickly pinpoints student proficiency and identifies appropriate learning goals. Together, Compass Learning and NWEA maintain a deep alignment between the NWEA MAP® (Measures of Academic Progress) assessment and the Compass Learning digital learning progressions to automatically provide each student with a personalized learning path based on his or her RIT range at the sub-strand level.

Scantron® Performance Series® is a computer-adaptive assessment that quickly pinpoints student proficiency and suggests key learning objectives to accelerate student growth. Compass Learning and Scantron use sophisticated alignments to translate Performance Series assessment data into individualized Compass Learning learning paths for each student.
Renaissance Learning® STAR® is a computer-adaptive assessment that quickly pinpoints student proficiency and identifies specific skills to accelerate student growth. Utilizing a powerful test translator tool, Compass Learning and Renaissance Learning work together to turn STAR assessment results into individualized learning paths containing rigorous, research-based instructional content for each student.

How It Works

1. Import Test Data
   - Compass Learning imports test data from assessments partner

2. Personalized learning paths are automatically generated and assigned based on students' scaled scores

3. Computer-adaptive tests help you quickly pinpoint the proficiency level of your student

   - Students complete research-based instructional activities targeted to identified learning needs

NWEA®, Scantron®, and Renaissance Learning® trademarks are property of their respective owners.
Research

Compass Learning® solutions are built using the latest learning research and the most up-to-date principles of instructional design. Read what the research has to say:

Regarding Compass Learning® . . .

Data-based studies specifically support the use of Compass Learning software as an evidence-based program in schools. Compass Learning has been used both as an enhancement and replacement for face-to-face instruction. It also has been used as a way to augment school curriculum and support the implementation of the response to intervention (RtI) framework and credit recovery in urban, suburban, and rural schools with widely varying student populations. Per research reviewed by the Department of Education’s What Works Clearinghouse (WWC), one study of Compass Learning math products met WWC’s stringent inclusion requirements (DiLeo, 2007).

In this study, students who used Compass Learning for math in addition to regular coursework scored an average of 103 points—or 17 percent—higher on the mathematics portion of Pennsylvania’s standardized test than those students who did not use Compass Learning.

Other research details several positive outcomes in schools that use Compass Learning programs. Burgess Elementary School in Myrtle Beach, South Carolina, used Compass Learning, and overall, students’ NWEA™ Measures of Academic Progress® (MAP®) scores rose 23 points for 2nd grade students, 20 points for 3rd grade students, 12 points for 4th grade students, and 19 points for 5th grade students. During the years that Burgess has used Compass Learning, the school report card has improved from “Average” to “Good” to “Excellent.”
Other schools have had similar successes utilizing Compass Learning as a credit recovery program for high school students. At B. F. Terry High School in Rosenberg, Texas, 78 students used Compass Learning, and within a semester, 25 of those students were able to increase their accumulated credits and return to their original cohort of students. Students in Stillwater, New York, schools also used Compass Learning for three years in a credit recovery program, which helped reduce the dropout rate from 14 percent to one percent.

The Upshot . . .
Compass Learning has been used in a number of research-based contexts to meet the personalized learning needs of students of all achievement levels—resulting in increased engagement and achievement in school.

This review of research strongly suggests that Compass Learning is an evidence-based solution that can be utilized in many different types of schools to address varying differentiated student needs with beneficial results.

For more information on the research basis of Compass Learning solutions, visit www.compasslearning.com/research-basis.

Contents on pp. 20–21 excerpted from “Research Related to Online Learning and the Use of Compass Learning to Increase Student Achievement and Engagement,” by Sally M. Reis, Ph.D., Dept. of Educational Psychology, University of Connecticut.

“Compass Learning allows us to target individual students where they are and define where they need to go. We are able to identify very specific areas of need.”

Travis Warnick, Assistant Principal, Arbor View High School
Let us help you connect the dots

We’re committed to helping your students succeed, and that means helping you find ways to fund that success. Sure, there is plenty of helpful information out there, but this information can be overwhelming. Our funding expertise can guide you through this often confusing and complicated process by helping you identify sources for federal, state, and private funding, helping you navigate through the rules and regulations, and providing resources to support your application. We understand the complicated processes and are ready to help your school or district meet its academic goals.

The Compass Learning® suite of K–12 digital learning solutions supports rigorous academic content standards and offers vast opportunities for exploration, discovery, critical thinking, analysis, and deep reasoning around the skills and objectives required for 21st century learning and rigorous new standards—all requirements of federal and state funding streams. Let us help you find available funding opportunities that align with your specific needs.

For additional funding sources or help, call us: 866-586-7387.
